**Climate Finance:
Who should provide &
who should receive?**

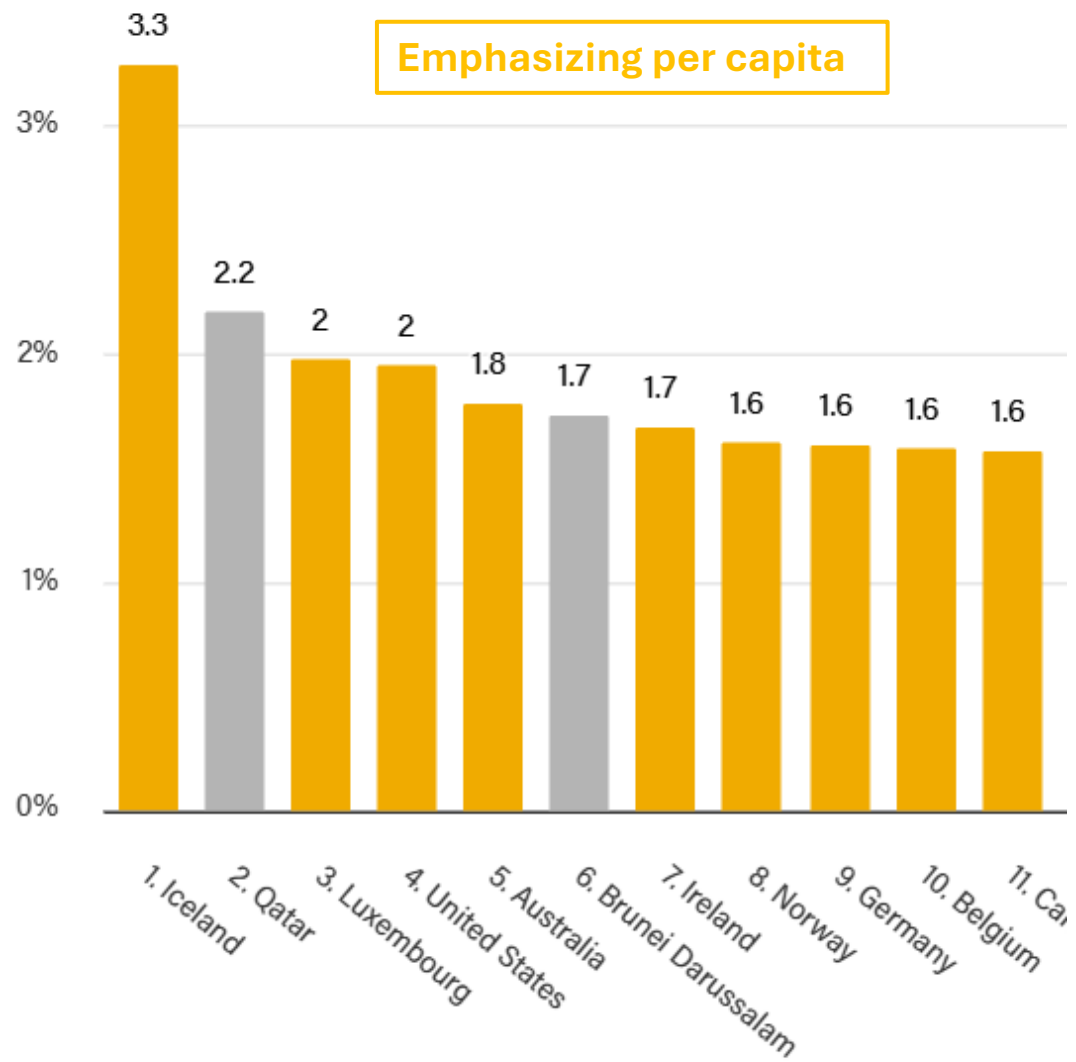

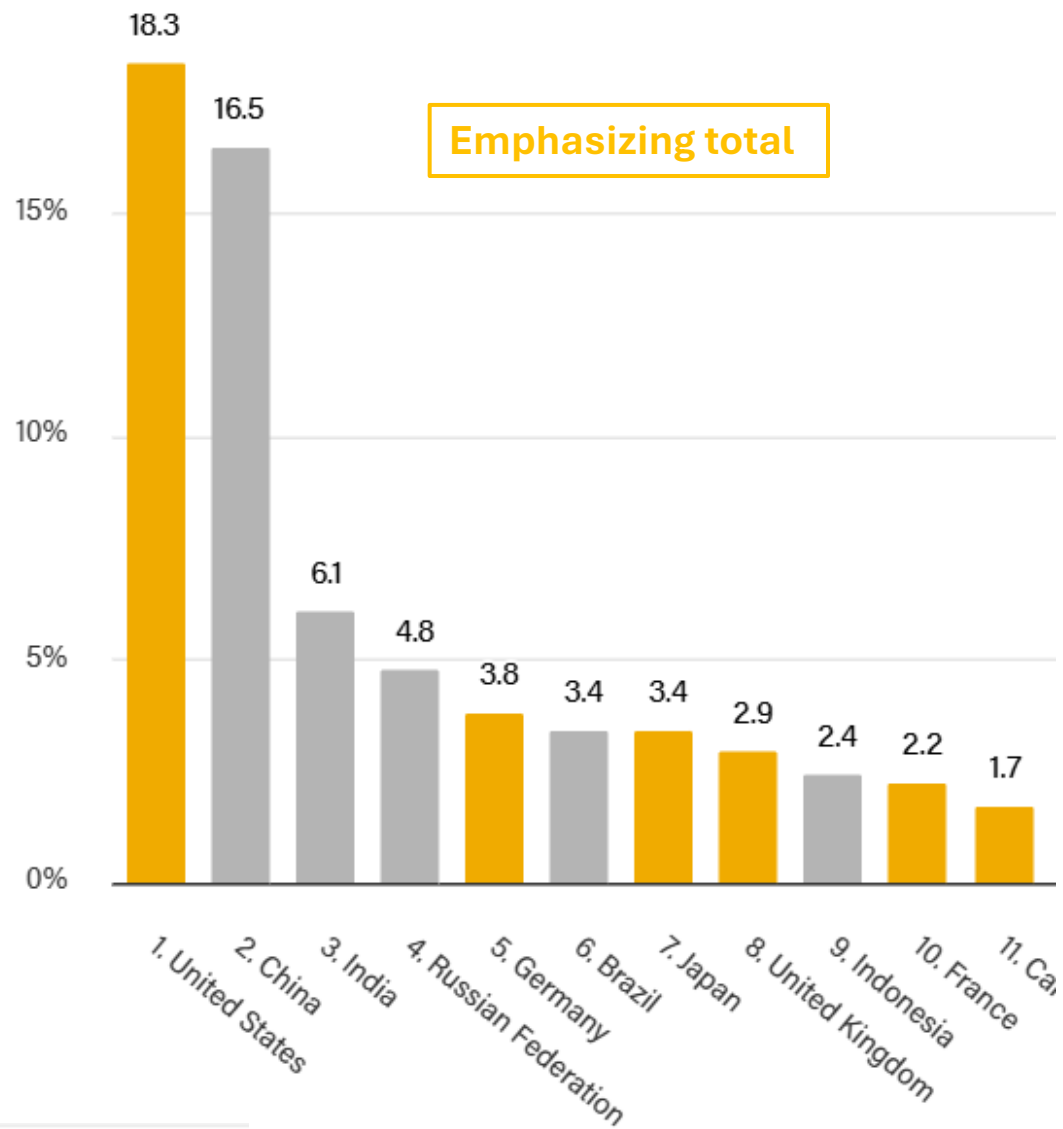

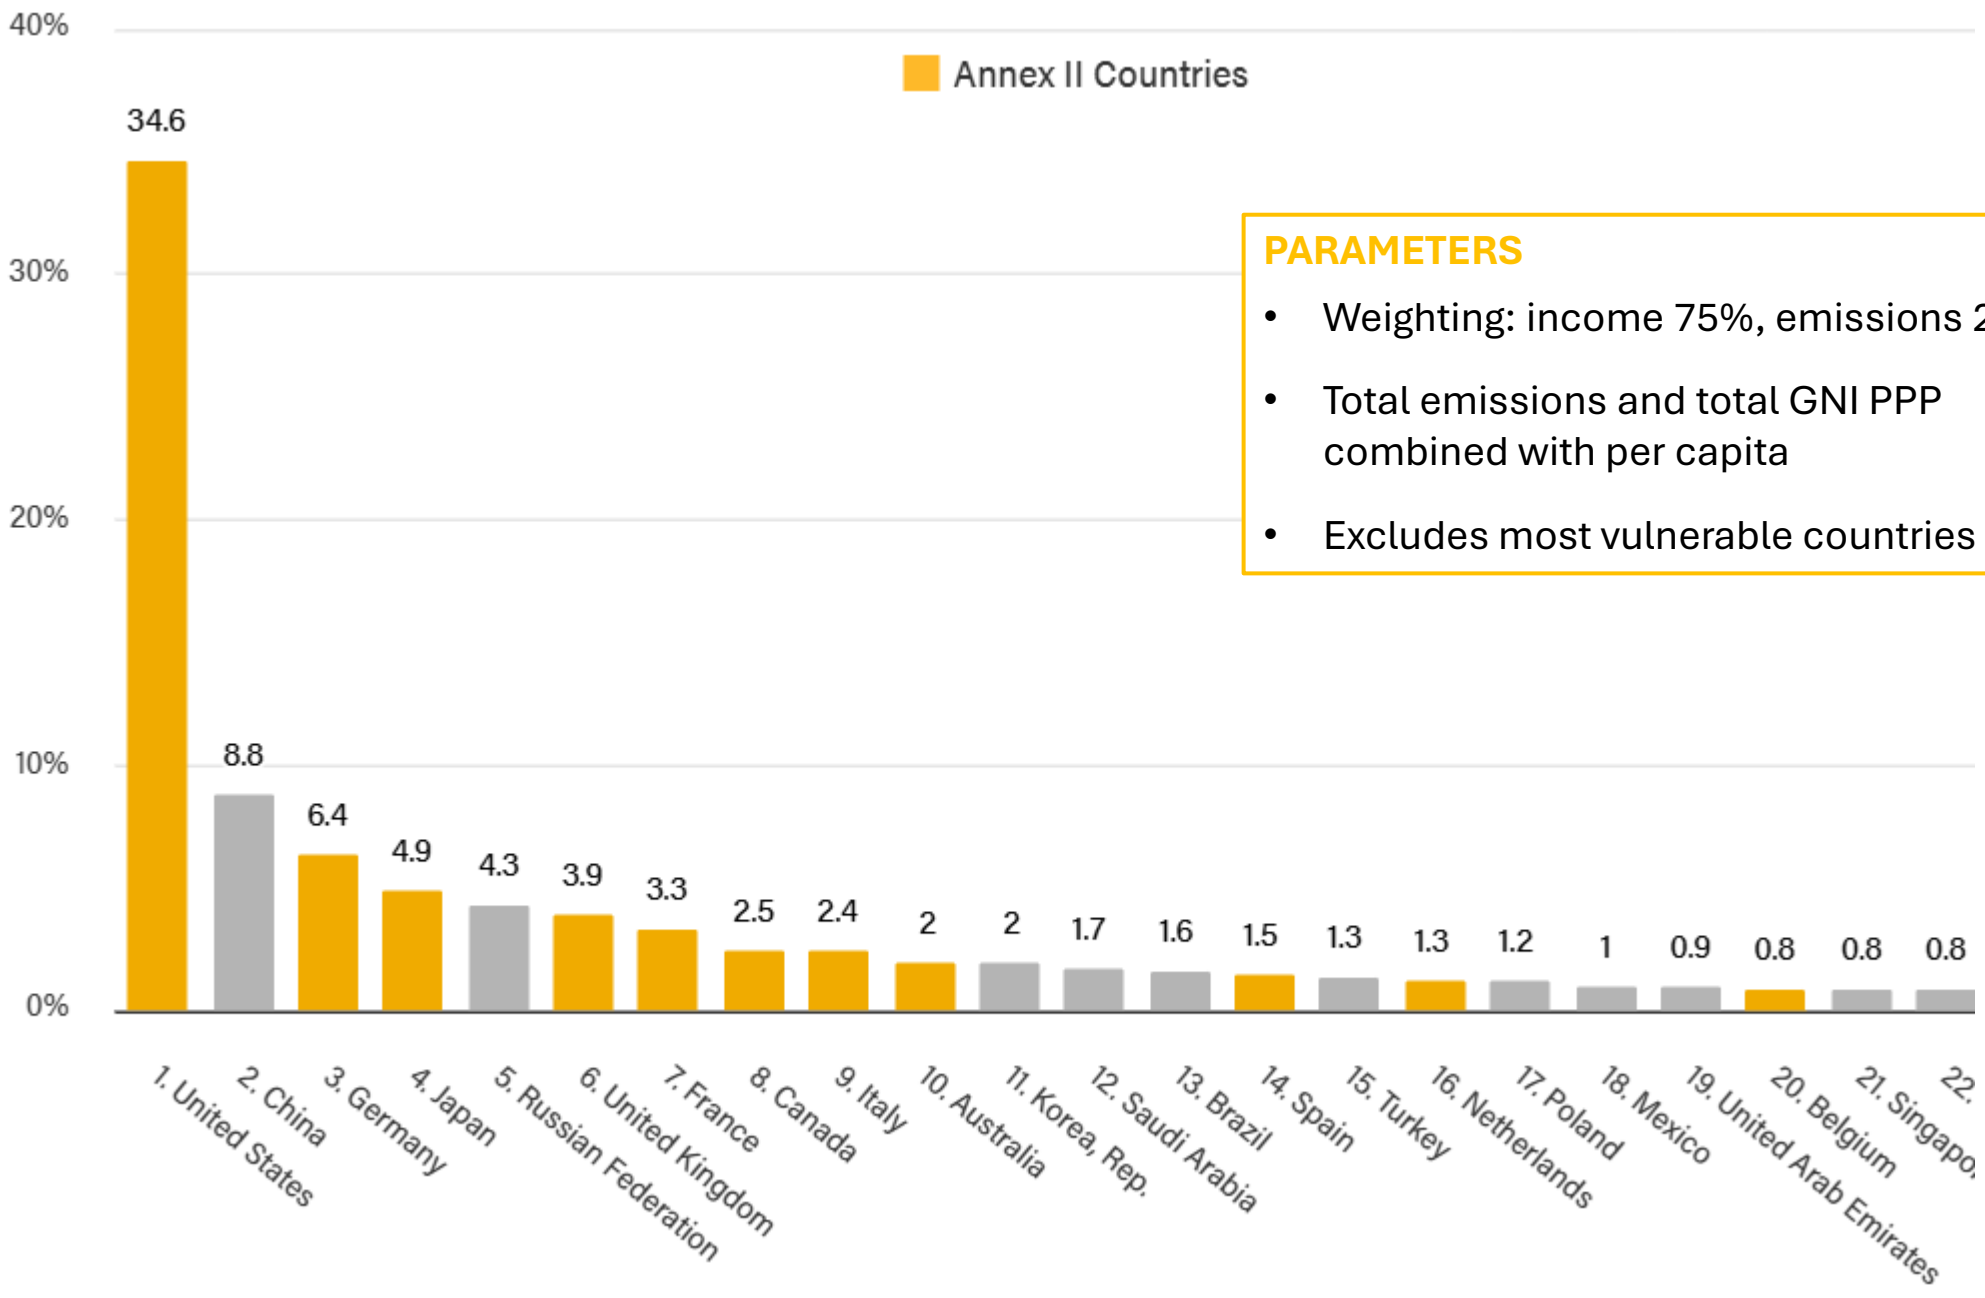

Who should provide:
Governments

Criteria could be based on:

- Income levels
- GHG emissions
- Climate vulnerability
- Other historical and current factors

Annex II Countries

PARAMETERS

- Weighting: income 75%, emissions 25%
- Total emissions and total GNI PPP combined with per capita
- Excludes most vulnerable countries

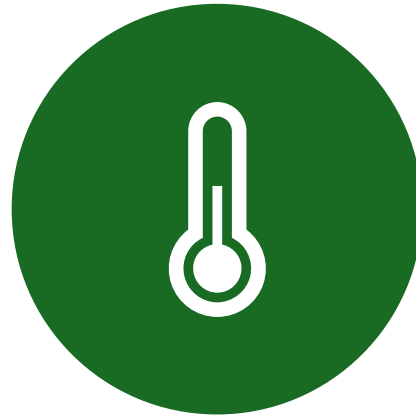

Who should provide: **Private sector**

- Not part of the same system of commitments and accountability, but should arguably be responsible based on climate impact
- To collect and distribute, could use efforts like:
 - Maritime shipping fee through IMO
 - Aviation fees
 - Fossil fuel windfall tax

Fairness in who receives
